EXTRA PROFITS TO OUR CUSTOMERS

For the convenience of our customers operating a Roadside Stand, Downtown Store, or Sales Yard in conjunction with their Nursery or Florists Business, we have incorporated a service, at cost, that will materially increase their profits.

For a nominal charge of 5c per plant, we will individually wax and VIT-A-HUME PAK (Vit-A-Hume Pak is the use of a life sustaining humus, high in Vitamin B-1 content, held securely in place around the roots with water-proof paper) the more popular varieties of rose bushes. A picture tag depicting the color and important characteristics of each rose variety, as well as planting instructions will be attached to each rose bush.

Shrubs will also be wrapped in a similar manner, at 5c each.

If you are not already equipped with a Roadside Stand, Downtown Store, or Sales Yard, but are located close to a well traveled highway, it will pay you to investigate the money making possibilities from this "Cash and Carry" enterprise offered by our "Garden for Victory" Service.

ROSES

All Burr Roses are budded on Multiflora, the finest and hardiest root stock in the world. Roses have been fertilized at the proper time, well cultivated and weekly dusted during the growing season. Good roots. Budded low for short shanks. All Roses graded according to the standards of American Association of Nurserymen.

PERENNIALS

Seed is sown in frames, then transplanted in sterilized soil; again put under glass and the second time transplanted to the field where they are grown under irrigation. This is the reason we can grow larger and much stronger plants than the ordinary run of perennials.

Size mentioned is height eventually attained.

Key to classification:

b Bedding or Border plant.

c Cut-flower type.
